

WANT YOUR CHILD TO LEARN COMPUTER PROGRAMMING?

The Instructional Technology Department is excited to announce that all 4th-8th graders now have accounts on Code Monkey, a self-paced software to teach computer programming to students. The program teaches students the language of CoffeeScript which is a computer programming language used in many industries worldwide. There are 90 self-paced levels, starting out very basic and slowly progressing so that kids learn in each lesson what they need for the subsequent lesson.

Students need to:

1. Go to berkeley.playcodemonkey.com and click SIGN IN.
2. Click the big red Sign in With Your Google Account Button.
3. Enter their @students.berkeley.net login and password
**** if your child doesn't know their login information they should ask their teacher for it****
4. Begin playing.
